Galleria Allegra Ravizza, Lugano; FL GALLERY (Federico Luger Gallery), Milan; galleria IPERCUBO, Milan e Wizard Gallery, London, are pleased to present a summer show focused on painting, hosted by Federico Luger Gallery's spaces in Milan. The four galleries present a selection of works by **Camilla Alberti, Danilo Buccella, Franklin Evans, Agnese Guido, Federico Luger, Alan Silvestri, Ludovic Thiriez** whose research focus on painting, and which for this exhibition are presented in conversation with a selection of "Atemobjekte", the breathing objects by **Günter Weseler**.

*Pittura di respiro* is an experiment in which a new generation of artists worked around the simple idea that painting helps us not only think and dream, but also breath: In dialogue with the breathing objects by **Weseler**, whose oeuvre focused on respiration since 1964, **Alberti, Buccella, Evans, Guido, Luger, Silvestri** and **Thiriez** suggest that breathing can also be conceived in terms of colour, as a completely personal experience that each viewer is invited explore in her/his own way.

The four galleries decided to collaborate in this summer show in order to celebrate the always current relevance of painting.

**Venue: FL GALLERY (Federico Luger Gallery)**

Via Aurelio Saffi 6, 1st floor.  
20123, Milan.
